Wetland Park

美眼蛺蝶

美眼蛺蝶常停留在地上日光浴和守衛領域。牠們飛行速度不高，除非受到驚嚇。牠的翅膀擁有巨大眼斑，令敵人以為眼前是一隻巨獸而不敢捕食。

Peacock Pansy

Peacock Pansy often stays stationary on the ground to take sunbath or guard its territory. Unless startled, it usually maintains a slow flight. It also has grossly oversized eyespots pattern on its wings, these "False eyes" deter predators by making it appear that large animal is watching them at all times.
